Subject: Microsoft settlement

I am glad the DOJ has followed the example of the individual states that have settled. For the sake of of the thousands of people employed by the technology industry, and a great American company, please finalize this settlement and end the lawsuit for good. Microsoft has contributed a great deal to our economy and we owe it to them to end this controversy.

I am a home computer user and like the compatibility of Microsofts different programs. I have no desire to use a combination of their competitors products that do not work together. Microsoft has agreed to share some of their technology with their competitors, as well as give billions of dollars of their products to schools. Please finalize this settlement and save our tax dollars from being wasted on needless lawsuits.

Gary
